NeonKey

Report **NK-EL-SAMPLE**
November 4, 2026
Prepared for **Pat Owner, Your Business LLC**

EMAIL SECURITY REPORT

yourbusiness.com

Sample report for a made-up business. Yours is built for your own domain and includes every record in full.

1/4
CHECKS PASSING

Needs attention

Your email works, but it's easier than it should be for someone to send fake email that looks like it came from you. 3 changes fix that.

Today	▮	1/4
After the changes	▮▮▮▮	4/4

Email provider
Google Workspace

Domain managed at
GoDaddy

HOW INBOXES CHECK YOUR EMAIL

Is the sender approved? Approved senders → **Is the message signed?** Email signature → **What happens to fakes?** Fake-email policy

WHAT WE FOUND

Mail delivery Passing
Your email is delivered by Google Workspace.

Approved senders Needs a change
Set up, but Google Workspace isn't on it, so your everyday email can look unverified.

Email signature Not verified
We couldn't confirm that Google Workspace is signing your email.

Fake-email policy Missing
Not set up. Inboxes don't know what to do with fake email in your name.

RECOMMENDED CHANGES

1. **Update your approved-sender list** at GoDaddy
   TXT record · name @
   `v=spf1 include:servers.mcsv.net include:_spf.google.com ~all`
   Replaces: ~~`v=spf1 include:servers.mcsv.net ~all`~~

2. **Add a fake-email policy** at GoDaddy
   Exact record and where to paste it: included in your full report.

3. **Turn on email signing in Google Workspace** one setting
   Exact record and where to paste it: included in your full report.

NEXT STEPS

Rather not do it yourself? Reply to our email and we'll make these changes for you, included in your $49. We'll recheck on day 2 and day 5 and send you an updated report.

Your $49 counts toward any NeonKey package. For example, a full Google Workspace setup with 2-step sign-in and backups is from $250 after your credit. Mention report NK-EL-SAMPLE.
